

## C575

### SecurTainer™ I Tamper Evident Specimen Containers

Better be safe than sorry!  
**TAMPER EVIDENT**  
 For your sample protection

Container made of polypropylene  
 Closure made of polyethylene

Especially designed for collection, transport and storage of specimens, Simport offers shatter resistant polypropylene containers, eliminating most problems of leakage and evaporation. Containers are uniquely stackable, shatter resistant and are manufactured from virgin, high-clarity polypropylene. The magenta lids are ribbed for easy opening when hands are wet or gloved while the jars are stackable for easy, safe storage and translucent to allow specimens to be viewed without opening. They are manufactured from virgin polyethylene with a unique integrated leak-resistant seal. Containers are available in the more rigid straight side format.

The uniqueness of the SecurTainer™ is that it incorporates a unique tamper evident screw cap ensuring your peace of mind during transport or storage situations where someone might have manipulated the specimen without your prior knowledge. Can also be used without using the tamper evident locking mechanism. For color coding purposes, use a Capinsert™ on top of the closure (see Series T345). Ten different colors are available.

Both containers and caps are manufactured without the use of plasticisers or mold release agents. All material used in manufacture are free from latex. All containers are 95kpa compliant. Available in many sizes from 20 to 120 ml. Non sterile. Containers and caps packaged separately in bags of 100. Five bags per case.

Cat. #	Volume	Qty/Pk	Qty/Cs
C575-20MA	20 ml	100	500
C575-40MA	40 ml	100	500
C575-60MA	60 ml	100	500
C575-90MA	90 ml	100	400
C575-120MA	120 ml	100	300

Place sample in container

Push up tab on side of vial.

Screw on Tamper evident cap completely.

When opening the vial, the tamper evident ring will detach itself from the cap.

The SecurTainer™ I can also be used without the tamper evident feature.

### SecurTainer™ II Tamper Evident Specimen Containers

Better be safe than sorry!  
**TAMPER EVIDENT**  
 For your sample protection

Container made of polypropylene  
 Closure made of polyethylene

This model uses a different tamper evident concept when compared to the C575 Series. No locking tab to push up is necessary when the tamper evident feature is used. Simply screw the cap on the container and the tamper evident sealing ring is automatically locking in place. When unscrewed, the ring is detached from the cap, showing clearly that the container was opened.

Also designed for collection, transport and storage of specimens, the polypropylene containers are safe to use even in adverse conditions. Containers are uniquely stackable, shatter resistant and are manufactured from virgin, high-clarity polypropylene. They are available in the more rigid straight side format. Available in many sizes from 20 to 120 ml. Non sterile. Containers and caps packaged separately in bags of 100. Five bags per case.

Cat. #	Volume	Qty/Pk	Qty/Cs
C576-20MA	20 ml	100	500
C576-40MA	40 ml	100	500
C576-60MA	60 ml	100	500
C576-90MA	90 ml	100	400
C576-120MA	120 ml	100	300

Screw cap on until a clicking noise is heard. This is when the plastic ring is firmly seated and locked over the container threads. When removing the tamper evident screw cap for the first time, the perforation is severed, thereby ensuring easy recognition that the container has been opened.

For color coding purposes, use a Capinsert™ on top of the closure. Ten different colors are available. (see T345 Series)

For more details and colors available please refer to page 111.
